

Course freak  
Your academic assistant.

Our problem:  
Distributed,  
unorganized,  
Inaccessible &  
out-of-date  
information.

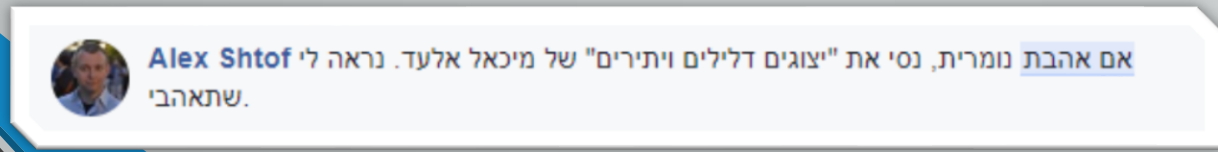

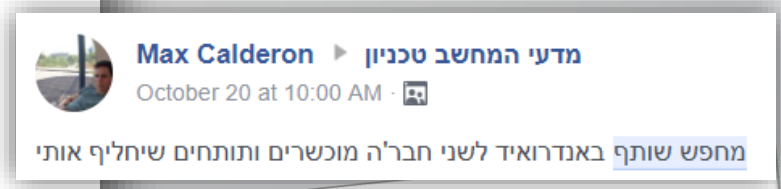

לדעתי הגנה זה קורס שחובה לעשות בתואר.  
אלגוריתמים לניהול זכרון דינמי - זה לא ממש מועיל כי זה סופר נישתי, אבל זה מלמד אותך לחשוב על בעיות דומות וגם יש ממוצע גבוה בקורס אז כדאי.  
לא יודע לגבי הקורס השלישי, לדעתי אם אין לך נסיון בתעשייה אז אולי כדאי לקחת תיכון תוכנה.

## Our Solution:

A unified platform for all course-related tasks in an interactive environment, just a finger click away.

Improved quality of data  
achieved by using our  
'HiveMind' architecture.

Course matching using our  
ML Recommender engine.

## Our Users:

Technion CS students,  
staff members and guests.

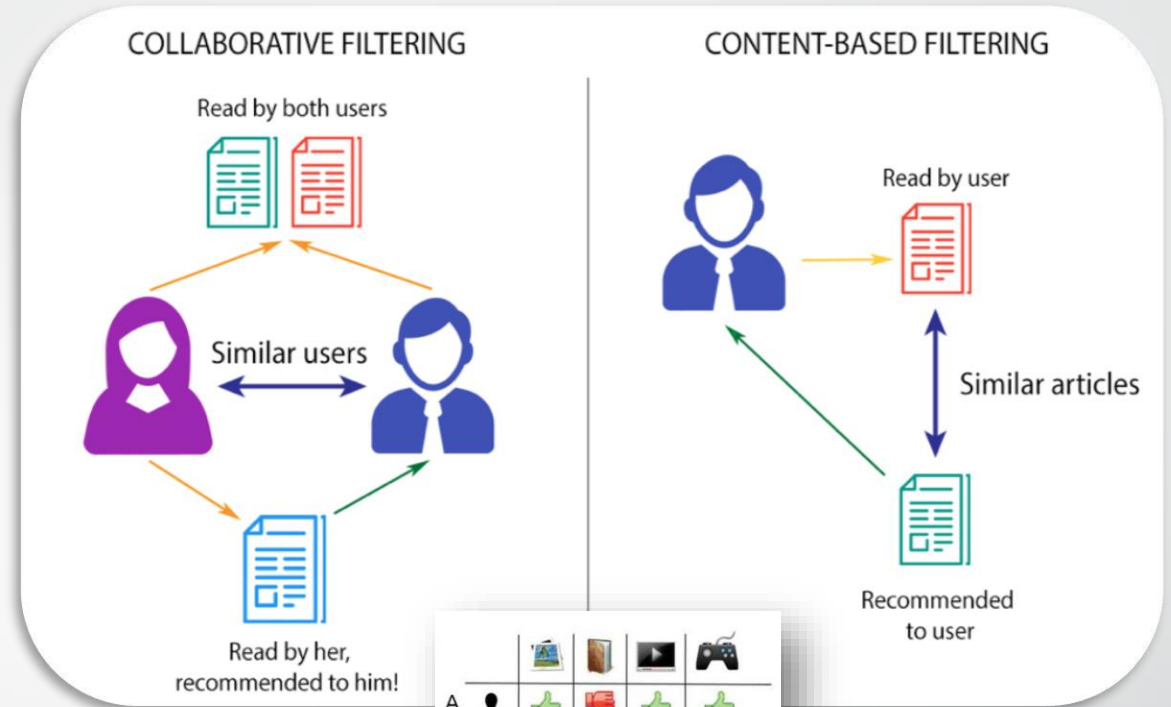

We keep all past years students' reviews and ratings to use the wisdom of crowds.

We continuously collect up-to-date data and filter it for you by your interests and needs.

We use students' feedback to show you only top reviews

We use advanced ML algorithms to give you the best recommendations for courses you might like.

# Course freak App

Interactive,

Android based UI that allows you to :

## Be a part of the mind hive

**Share your experience with other students.**

Write reviews & give feedback to others.

Play our interactive game and win honey jars while helping us improve our data accuracy.

[With us, your opinion really makes a difference.](#)

## Always stay alert

**Let our smart engine let you know when new opportunities arise.**

When your friends are looking for partners or are interested in a course, you'll be the first to know.

[With us, you will never miss a chance.](#)

## Time to make decisions?

**Let our sophisticated machines do all the work for you.**

Rank a few courses you already took, sit back and let our app show you your future. Our background algorithm will find students with taste like yours.

[With us, you will never again take advice from a נציטין נשיא.](#)
